XANTHADRENE

[WITH FUCOXANTHIN]

288MG

Introducing XANTHADRENE™, a new non-stimulant thermogenic fat burning weight loss formula with fucoxanthin, a revolutionary new compound clinically proven to reduce body weight by up to 10% .

XANTHADRENE is a totally new and innovative approach to weight loss especially around the abdomen area.

- Promotes & Supports Healthy Metabolic Rate & Breakdown of Fat.
- Burn up to 10% more body weight, mainly from around the abdomen.
- 450% greater weight loss than diet alone after just 16 weeks!
- Contains Fucoxanthin Extract from Brown Seaweed and Pomegranate.
- Contains Certified South African Hoodia (an excellent appetite suppressant) and a Green Tea Extract (for energy)

Fucoxanthin appears to target a protein called UCP1 that increases the rate at which abdominal fat is burned. Abdominal fat, also called white adipose tissue, is the kind of fat that surrounds our organs and is linked to heart disease and diabetes.

Fucoxanthin also appears to stimulate the production of DHA, one of the omega-3 fatty acids found in fatty fish such as salmon. The weight loss benefits of Xanthadrene are enhanced by an active ingredient in pomegranate seed which helps prevent new fat cells from developing by choking off their blood supply and stunting their growth.

Supplement Facts

Serving Size 1 Capsule
Servings Per Container: 90

	Amount	% Daily Value
